**About:**

Every summer, the Society of Women Engineers (SWE) at Texas A&M University hosts a week-long summer camp for middle school girls, featuring the many opportunities available in the fields of engineering and science. Through hands-on demonstrations, team-building activities, and design competitions, the girls will discover that engineering is not just men spending long hours in an office. Instead, they will find that engineering is an exciting and rewarding field that leads to careers in developing 3D movie technology, designing roller coasters, creating the next generation of cell phones, exploring outer space, and finding solutions to complex problems that shape the world we live in.

The camp is organized and led by active members in SWE. These ladies spend months planning for the camp and they will serve as female role models who are pursuing a degree in engineering.

**Who can attend?**

who are interested in math, science, or engineering are encouraged to apply.

**Cost:**

A fee of $200 is required for participation in the camp. This fee will be collected from the participants AFTER they are notified of their acceptance. PLEASE DO NOT SEND MONEY WITH THE APPLICATION. Scholarships are available for those who qualify for financial aid.

**Deadline:**

Applications are expected to be available on our website (swe.tamu.edu/summcamp) in December and they are due online or post-marked by Monday, March 2\textsuperscript{nd}, 2015. The SWE summer camp mailing address can be found on the back of this brochure. Acceptance letters and additional information will be mailed out by early April.
Past Experiences:

- Design competitions
- Hands-on demonstrations
- Campus tours
- Company presentations
- Fun with Yell Leaders
- Movie night
- Fun games and activities
- And much, much more...

Engineering Summer Camp

Hosted by the Society of Women Engineers

Location:

Texas A&M University
3127 TAMU
College Station, TX

Starting: Sunday, June 21st 2015
Ending: Friday, June 26th 2015

For 7th and 8th grade Girls interested in Math, Science, and/or Engineering!
